# *How to Embed Codes into Weebly Pages*
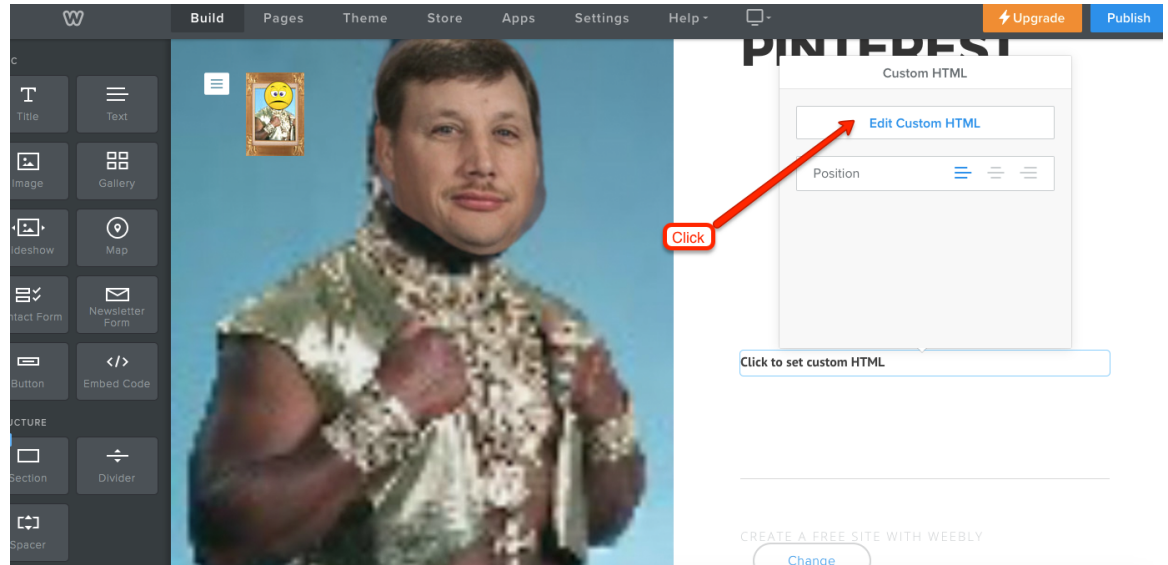

1.   Load up your Weebly web site to edit.

2.   Go to the page you want to **embed** code in or Create a new page.

3.   Click  and dragon the button (on the **Build** page) called *Embed Code* and place it on your page.

4.   Click on the text *Click to set custom HTML.*

5.        Click on *Edit Custom HTML.*

6.        Paste (**Command-V**) your embed code that you copied from another site.

7.        **Publish** your site.
