

Vyond Project

You are to create an animation using Vyond. I have set up a free trial (14 days) through our school for you to use. The link for the site can be found through the class web site under the ***Video Editing*** tab then ***Animation*** page. Use your creativity for the animation as you can do whatever you want as long as it is school appropriate. The video must be at least 30 seconds long and must tell a complete story (not just end because you have reached 30 seconds). Add whatever extra touches (music, your voice instead of the robotic-supplied voice, ...) you want. We will be watching your video in class, so put good effort into it and take pride into your work.

REQUIREMENTS:

- At least 30 seconds long
- School Appropriate
- Tells a “complete” story
- Link to your animation posted on Videos page under Title ‘Vyond Animation’
