

“How To” Video Project

For this project, you are to create a “How To” video that shows a ‘**Step-by-Step**’ process on how to do a simple task. The editing for this project will be done using Adobe Spark (spark.adobe.com) or WeVideo (www.wevideo.com). Adobe Spark will allow you to quickly make your video or if you want to really put in more detail and features in your video then use WeVideo.

The “How To” video should not be one continuous shot, but broken down into each separate step of the process. It should clearly show how to do something from the beginning to the end. There is NO Time length requirement as long as the entire process is completely shown. Have fun with this project.

Requirements for assignment:

- Use WeVideo to edit and create the video
- Title slide
- Video edited into separate parts showing each step individually
- Text or Voice-over describing each step clearly
- Ending/Credits slide (No last names)
- Posted on **Videos** page of your web page. Titled “**How To...**” (give the name of your project after *How To*)
- Turned in Grading Rubric to Mr. Bratina

Optional

- background music or Intro/Exit music
