

# *Morphing Project*

In this project, you will create a “Morph” of you through different years of your life. There will be at least 2 morphs based on 3 pictures (Example: Baby to Elementary and Elementary to Now). The pictures should be approximately the same size and head shots (Your school pictures work very well for this).

To create this morph, you will be using 2 different software programs: MorphX (for creating the morph) and WeVideo (to create the final morph video). WeVideo is a Web 2.0 tool and MorphX is a free software download that can be found on the classroom web site (<http://btweb20.weebly.com>).

## **Requirements for assignment:**

- Title Slide
- At least 2 morphs based on 3 pictures
- Transition or Video effect between the Title and Morph
- The morphs and transitions should be smooth
- Background music during the video
- Post the final video on your web site on a New Page titled “*Videos*”

\*\*\*Feel free to add more pictures and any other touches that you want.
