

# *Web 2.0 Tool Tutorial*

You are to create a tutorial (either printed manual or video) on a Web 2.0 tool that you reviewed earlier in the year or a new tool using Jing for screen or video captures of your computer screen. This tutorial should take the person step-by-step on how to get to the Web 2.0 tool and how to use it. Each step should be illustrated by a picture or video of the process. Look at tutorials that were given to you during the class year as a reference on how it should look.

When done with the tutorial, create a new page on your web site with the title of the Web 2.0 tool. On the page, put the Web 2.0 tool logo on it with a brief description of the tool and link to where the tool can be found. Post your tutorial below that description for downloading (manual) or viewing (video). Again look at the class web site (BTWeb20.weebly.com) for reference on how this should look.

## **Requirements:**

- Complete Step-by-Step tutorial on how to use a Web 2.0 tool
- Using Jing for screen or video captures of computer screen for each step
- Using Jing to point out and label on screen captures
- New page titled with Web 2.0 tool name on your web site
- Web 2.0 tool logo on web page
- Brief description of Web 2.0 tool on web page
- Link to Web 2.0 tool on web page
- Posted tutorial on web page
